Two Papers for the Price of One.

DECORATION DAY.

THE GRAVES OF CONFEDERATE DEAD COVERED WITH FLOWERS.

A Large Crowd in Attendance—The Speech of the Day by Hon. Folk Laffoon.

A large crowd attended the ceremonies at the cemetery Wednesday evening, the occasion being the observance of Confederate Decoration Day. Dinner was served by the ladies of the Memorial Association at Moayan's Hall, where numerous visitors, many from Tennessee, were fed after which the procession, with many carriages, marched to the cemetery, where the ceremonies attending the decoration took place. Ned Mettewer Broun of ex Confederates, had the ceremonies in charge. Many veterans from elsewhere were present and took part in the exercises.

A band of music led the way to the cemetery and the veterans followed on foot. The graves of 101 unknown soldiers, buried under the Latham monument, were decorated with flowers and a detail was appointed to decorate the graves of soldiers in other parts of the cemetery.

Capt. C. D. Bell was master of ceremonies and introduced Hon. Folk Laffoon as the orator of the day. His address was eloquent, patriotic and appropriate. At its conclusion Miss Hattie Lee Johnston, the young author, recited the following poem from Father Ryan, in a very happy and graceful manner:

Let our dead gather sleep,
Gather the sacred dust
Of the warriors tried and true,
Who bore the flag our nation trust,
And died for me and you.

Wherever the brave have died,
They should not rest apart;
Living they struggled side by side
Why should the hand of death divide
A single heart from heart?

Gather them each and all
From the private to the chief,
Come they from cabin or lordly hall,
Over their dust let the fresh tears fall,
Of a nation's holy grief.

No matter whence they came,
Dear is their lifeless clay—
Whether unknown or known, famous—
Their cause and country were the same
They died—and were the gray.

Gather the corpses strewn
O'er many a battle plain;
From many a grave that lies so lone,
Without a name and without a stone,
Gather the bones and the bones of men,
And the dead shall meet the dead,
While the living over them weep:

For the men who Lee and Stonewall led,
And the hosts that once together bled,
Should now together sleep.

The ceremonies concluded with some stirring selections of music.

Received Their Diplomas.

The commencement exercises of South Kentucky College were concluded Wednesday night with an entertainment at the Opera House. The following graduates received diplomas:

Degree A. B.—James Abner Young, Jr., Mendenham Hunt Nelson, Jr., Degree B. L.—Grace Garnett Davidson, Edie Gale Wood.

Degree B. S.—Norburn Ragon Faris, Harry Knight Anderson, Sheila Balfour Aden, Sallie Edna Jones, Roberta Guyan Green.

The musical program given in Tuesday's Kentucky was carried out, all of the young ladies and gentlemen acquitting themselves most creditably.

A Narrow Escape.

Mrs. Thos. W. Long, while out riding on her bicycle Tuesday afternoon came near being seriously hurt. She had just alighted from the wheel when the horse driven by Mrs. E. H. Anderson ran into the wheel. Mrs. Long was thrown violently to the ground and sustained a number of bad bruises. The animal was quickly stopped, thus averting what might have proven a fatal accident. Mrs. Long will be able to get out in a day or two.

Killed a Mad Dog.

Robt. Davis, of this city, was attacked by a rabid dog on the farm of Mr. Davis Wilkins, in the Antioch neighborhood, Tuesday. Mr. Davis fired two loads of shot and five pistol balls into the body of the animal before it was despatched.

GILBERT LOWRY—Mr. Geo. S. Gilbert, a Clarksville attorney, and Mrs. Lula B. Lowry, daughter of Col. S. J. Lowry, of Garrettburg, were married at Olivet Baptist church Wednesday morning. Immediately after the ceremony the happy couple left for the South on a bridal tour. On their return they will reside in Clarksville.

Although the assault committed upon Mrs. Trimble near Adairville last Friday evening continues to be freely discussed, there is yet no clue to the perpetrator of the deed. Mrs. Trimble is now entirely convalescent and at no time has been in danger of death.

With seven districts unreported, Jones has 121 districts voted and Harrod 123 for the Democratic nomination for Governor of Arkansas.

PRIMARIES IN OHIO.

Silver Rules the Day in the Buckeye State.

Cincinnati, June 8.—The Democratic primaries of Hamilton county to-night resulted in the election of sixty six silver and two gold delegates to the Democratic State convention at Columbus, June 23. The primaries were by popular vote under the Bailey law. There was no convention. Of 6,219 votes, 5,756 were cast for the silver ticket, and the city of Cincinnati cast 4,000 silver votes.

The returns tonight from other counties show the delegates selected up to date to the State convention stand as follows: Silver 307, gold 14, unreturned 29.

Wedding Near Howell.

Howell, June 10.—A very swell wedding occurred at Olivet church near Howell June 3rd, at 9 o'clock p. m. The high contracting parties being Mr. Thos. F. Clardy and Miss Nell Hester Fox, both of this vicinity. The ceremony was performed by Rev. McCorkle of Providence, Tenn. The bride party were preceded to the altar by four ushers, viz: Messrs. Douglas Bell and Rawlins Clardy; John Garret and Ford Holloway.

Then followed the four couples of attendants, Mr. Austin Bell, Miss Cecil Holloway, Mr. U. L. Clardy, Miss Bertha Barrow, Mr. Ernest Coleman, Miss Eula Harrison, coming in singly from opposite sides crossing at the altar. The bride entered leaning on the arm of Miss Mary Clardy, she being maid of honor, while Mr. Clardy came from the opposite aisle with Mr. P. T. Fox, his best man.

Truly it was a pretty scene; the church had been beautifully decorated for the occasion. The draperies and flowers being white, and as the organ pealed forth the wedding march, under the skilled touch of Miss Donnell the ladies looked like fairies as they slowly moved in the soft mellow light. They were all dressed in white, evening dress, wore and carried natural white flowers. The gentlemen were becomingly attired in the conventional black suits, were white gloves and ties. Taken as a whole the party was exceptionally a handsome one. The bride is the youngest child of Mr. and Mrs. Peter Fox, both long since deceased, and comes from one of the best families in the state. She is decidedly of the blonde type, is a very intelligent and lovely young lady; her attractions cannot only of her pretty face, but her lovely disposition, her pleasant manners, friendly pleasing address, not only made her quite a favorite with the young people, but the older ones and the children. She was said by many to have been most popular lady in the Howell neighborhood, and to say Miss Nell will be missed expresses it mildly. Mr. Clardy is to be congratulated in securing the heart and hand of so attractive, lovely a lady. Mr. Clardy is a son of Mr. Jas. M. Clardy, engaged in mercantile business at well, is a promising young man and is deservedly popular.

Immediately after the ceremony the bride party repaired to Mrs. Liz. an elegant reception was tendered them, and with whom they have taken rooms and board. On Thursday night the party was entertained at the hospitable home of Mr. and Mrs. J. M. Clardy, where a tempting repast was spread. Friday night Miss Cecil Holloway visited the party to accompany her home, where they were royally entertained.

They were the recipients of many handsome and useful presents, too numerous to mention.

It is with much reluctance that Howell society gives up Miss Nell, under the circumstances, and carries to the Bell neighborhood, and carries with her the best wishes of everybody.

It was announced Saturday that Miss Jennie Tompkins, daughter of Mr. and Mrs. W. W. Tompkins, of Danville and Mr. Curtis Montgomery, of Louisville, who were formerly very much married, had been married December, Mr. Montgomery was a member of the Sophomore class in Centre College, and the main reason, it is said, for keeping the marriage secret was that he wanted to wait until college closed. The groom, who is about twenty-one, is an orphan, but is said to own considerable landed property in Carroll county, where he and his wife will live on a farm—Danville Advocate.

Dixon C. Williams, of Chicago, Ill., a Cumberland Presbyterian evangelist, who was vice-president of the Chicago Manufacturing Co., 240 to 248 West Lake street, had a difficulty with "Hack" Miller, a lively stable man, at the Palace at St. Louis, which resulted in Williams dangerously cutting Miller with a knife in the abdomen. Miller is in a critical condition, and may not live. The origin of the difficulty was a misund understanding over an order for a lively team.

There will be 158 contested seats in the Republican National Convention. They are from fifteen States and one Territory. The entire delegation from five States is contested.

CREAM OF NEWS.

IF IT IS NEW AND TRUE THIS COLUMN HAS IT.

Dropped Dead—Tried to Suicide—Fire at Trenton—Eyes Put Out—Base Ball and Shooting Club.

Hopkinsville Will Head the List.

Our local team of ball players won both games from Henderson at the Athletic Park in this city this week. Henderson was whitewashed on Tuesday, the score standing 7 to 0. On Wednesday the score was 9 to 3. Hopkinsville simply outplayed the visitors at every point and no special effort was made to run up the score further. Owensboro crossed bats with the locals yesterday and will play again here this afternoon. Hopkinsville feels confident that she will win one if not both games from the Davies county club, and in either event she will head the list in the Pennyrile League. A good crowd witnessed yesterday's game and a much larger one will be on hand today.

Public Schools Close.

The public entertainment at the Tabernacle last night marked the closing exercises of the Hopkinsville Public Schools. The class exercises at the school rooms to-day will bring the session to an end. The session has been a successful and highly satisfactory one under the management of Supt. McCartney. The following were the High School graduates this year: Jos. Armstrong, Nettie Edmunds, M.C. Blakemore, Sarah L. Gorman, Alex. Bourland, Mary L. Herndon, James Means, Martha McArley, Louis Payne, Emma Lee Price.

The election of teachers for the fall session will take place to-night. There are 26 or 30 applicants for the 12 places to be filled.

Fined For "Scraping."

E. H. Armstrong and Tony and Charlie Dattilo had a difficulty on the streets Tuesday. The three were taken before Judge Hanbery Wednesday for trial. The Italians were each fined \$5 and costs for using profane language, Armstrong was assessed one cent and costs for breach of the peace, and the charge against Joe Rocco, another Italian, was dismissed. The lines were satisfactorily arranged and defendants released.

The African Snake Plant.

Mr. Henry Blumenstiel is growing a rare flower known as the African Snake Plant. The plant is now about a foot high, is apparently in a thrifty condition and its leaves are a pale yellow, while the stalk is a perfect green. He raises the herb very highly and hundreds of people have called to see the growth so uncommon in this country.

Sudden Death of Prof. Snow.

Trenton, June 10.—Prof. H. O. Snow dropped dead about 7 o'clock last night, of heart failure. He had been complaining of feeling unwell for several days, but ate a hearty supper last night and appeared to be much better.

He was 64 years old and leaves a wife and several children.

Fire Near Trenton.

Trenton, June 10.—Mr. Sam Minnis had the misfortune to lose his dwelling, its contents and several out buildings by fire while the family were away from home. The Methodist conference is now in session at this place and chickens have advanced 50 per cent. in price.

Cut Off a Leg.

Mr. Chas. G. Christian, a farmer living near Elkton was thrown from his reaper Tuesday, while cutting wheat and one of his legs was nearly severed from his body. Mr. Christian's condition is quite serious and there is no hope of saving the injured member.

Gracey Goes Down Again.

The Cadiz base ball team played Gracey on the latter's grounds Wednesday and were victorious by the score of 23 to 21. Baker and Scheutz composed the Trix county battery, while Meacham and McGhee held down Gracey.

Destroyed His Eyesight.

A little son of Mr. W. R. Smith, an employe of Forbes & Bro., while playing around the cow pen, was kicked, in the face by a calf, knocking out one eye and injuring the other so badly that it is feared that he will become totally blind.

Circuit Court Matters.

This week has been taken up principally in the disposition of civil matters. Next week will be devoted to the trial of Commonwealth cases. The grand jury will probably return another batch of indictments today and will adjourn this week.

MANY STATE CONVENTIONS.

Delegates Being Chosen For The Chicago Convention.

Hartford, Conn., June 10.—The Democratic State convention to select delegates to the national convention at Chicago, and Presidential electors met here to-day with a full attendance of delegates.

The platform declares for the gold standard and endorsed the administration of President Cleveland and especially approves "this firm support of the public credit and his explication of the Monroe doctrine."

Delegates For Utah.

Virginia, I. T., June 10.—The Indian Territory Democratic convention, held in this city, has elected four delegates from the respective nations in this Territory and two delegates at large. Free coinage of silver at the rate of 16 to 1 was endorsed, and the delegates were instructed for Bland for the presidential nomination.

Mayfield For Gold.

Baltimore, Md., June 10.—The Democratic State convention was presided over by Senator Gorman. The platform declared for the gold standard and endorsed the Cleveland administration.

Nevada For Silver.

Reno, Nev., June 10.—The convention of the so-called regular Democratic party of Nevada met to-day. The platform declares for the free and unlimited coinage of silver; is against taking religion into politics; the amendment of the naturalization laws and indorses Cleveland in everything except his policy on the money question.

Rephenshaw Incompetent.

Frankfort, Ky., June 10.—A telegram received here this morning from Eddyville where the members of the Sinking Fund Commission have been for some days gives the information that the commissioners may decide not to rebuild the site of the recently destroyed prison at that place, but will decide to abandon the branch penitentiary entirely. There are at this time about 600 idle convicts here and the commissioners do not seem to know what to do.

Frank Mayo Dead.

Omaha, June 8.—Frank Mayo, the actor, died very suddenly of paralysis of the heart to-day while on board the Union Pacific fast mail going east, near Grand Island. Mr. Mayo was not to Omaha with his company, where he was to open an engagement to-morrow. Dr. M. J. Gahan of Grand Island, was telegraphed to meet the train. When the fast mail pulled into Grand Island the physician boarded the train, but his services came too late. Mr. Mayo having expired a few moments before.

Magnificent Cattle.

Louisville, Ky., June 8.—Yesterday Entry & Poor shipped from Nicholasville 2 head of export cattle to Nelson, Morris & Co., of Baltimore. The steers weighed from 1,800 to 2,000 pounds each, and were fed during the past winter and spring on the war much which was up at E. J. Curley & Co's distillery. This is probably the finest lot of cattle which have left the state this year. After leaving Baltimore they will be sent on to Liverpool by Nelson, Morris & Co.

Two Attempts to Suicide.

Mayfield, Ky., June 8.—Miss Alice McGee, the twenty year old daughter of Mr. James McGee, who keeps a restaurant on Broadway, attempted to commit suicide last night by taking a dose of morphine. When discovered she is in a comatose condition. She is still alive but in a very critical condition. No reason is assigned for the act.

About the same time Mrs. Malinda Johnson attempted to take her life the same way with the same result.

A Double Baby Frank.

Brownsville, Ky., June 10.—Mrs. Willis Lindsay, wife of the dairyman here, on last night gave birth to twin boys.

The babies were united together, two heads, four feet and three arms, and were grown solidly together from shoulder to hip.

Adjourned Yesterday.

Washington, June 10.—Congress to-day settled its differences and by joint resolution fixed upon 4 o'clock to-morrow afternoon for the end of the session.

At Greenup a somnambulist grabbed his sleeping room mate and was about to throw him off the roof when the owner of the house luckily put in an appearance and interfered.

A French paper asserts that 3,873 perished and that 4,000 persons were injured in the crash on Knodjasko plain, outside of Moscow, on Saturday morning last.

Big Cut

A Little Girl's Escape.

A PALE, THIN GIRL BECOMES ROSY AND PLUMP.

St. Vitis' Dance Checked—A Loving Daughter Saved.

(From the Kansas City, Mo., Journal.)

The following possesses an interest in the Journal and its readers, because the case is of great value from a medical point of view, and further because it is so true and its truth absolutely proven. The case described is that of the daughter of L. L. Barber of Edgerton, Kan. She being duly sworn on oath deposes and says:

During the spring of the current year, 1903, my daughter Berlie, aged 12 years, became afflicted with a nervous disorder which grew upon her to such an extent that it seriously interfered with her studies, and upon the gravest of them it would develop into St. Vitis' dance. My daughter became nervous and restless, and would at times be seized with nervous twitches which excited the alarm of myself and wife. About this time my wife read in a newspaper of a wonderful cure of the same disease effected by Dr. Williams' Pink Pills for Pale People. So strongly was I impressed with the facts set forth in the testimonial that I wrote to ascertain the authenticity of the cure. Receiving a reply which completely satisfied me, I sent for a box of the pills.

From the very first day a marked improvement in my daughter's condition was noticed. She had become thin and excessively pale, as is common to sufferers from nervous disease, and her weight had decreased to an alarming point. After a careful and thorough trial of the pills, she not only began to grow less nervous but began to gain flesh.

It need not be said that I was both surprised and delighted with the wonderful change brought about by the first box of the pills. She is now a girl, and all the symptoms of her disease have disappeared. Dr. Williams' Pink Pills have certainly wrought a wonderful and complete cure, and I am saying nothing too good in their favor. But now she is away on a visit, and she would not have thought of being able to do three months' work. From being stammering, timid and ill, she has become a strong, healthy girl with an appearance of ever having been afflicted with no ailment. The pills have done wonders, and I take great pleasure in recommending them to all who are afflicted with a similar disease. (Signed) L. L. BARBER.

Signed and sworn to before me this 14th day of August, 1903.

(Notary Public.) W. H. KELLY, Notary Public.

Mr. Barber, who was present, declared that they owed their daughter's life to Pink Pills.

Dr. Williams' Pink Pills contain all the elements necessary to give new life and richness to the blood, and restore shattered nerves. They are manufactured by Dr. Williams' Medicine Co., Rochester, N. Y., and are sold only in boxes bearing the firm's trade-mark and wrapper at 50 cents a box, or six boxes for \$2.50, and are never sold in bulk or by wholesale or by mail.

PERSONAL APPEARANCE.

How It Affected a Business Man's Credit Twenty Years Ago.

As a well-known banker alighted from his carriage in Wall street yesterday an old merchant turned to your correspondent and said: "I remember something when a man's credit would have suffered if a business man came to his office in a carriage. In those days one was looked upon with suspicion if he carried a cane, unless he was actually lame. A man would have had difficulty in arranging a loan at his banker's if he wore a mustache, as it was considered the appendage of a sport."

I well remember that when, as a young man, I began to cultivate the growth of hair on my upper lip, my employer gave me a friendly warning. "One could then go to business in what is now evening dress, and yet be considered as properly, though elegantly, attired. Now a man would be hooted at in the streets if he should wear his evening dress in the daytime. But times have changed greatly, or rather fashion has, for human nature is the same. After a long business career my deliberate judgment is that it pays to wear good clothes, fashionably made. I remember when as a boy I began my business career at six dollars a week. I was sent on an errand to a swell tailor's establishment of the city. After I had done my errand the tailor looked me over, and, noticing my country-made clothes, said to me that I ought to order a new suit. I explained to him my financial condition, when he said to me kindly: "My boy, whatever it might cost, it would be the best business investment you could make. With fashionably cut garments on your own confidence and self-respect will be enhanced, and other people will think better of you," and he generously offered to make me a suit and let me pay for it whenever I could, or not at all. He was right. It was as good as an investment as I could have made, for I believe the habit it gave me of always wearing good clothes helped me immensely in my business career. I traded with that tailor for over 30 years."—Philadelphia Public Ledger.

A BOON FOR SAILORS.

How the Ferris Wheel Will Help Those on Lake Michigan.

The Ferris wheel, which has begun operations at its new location near Lincoln park, will be more than a means of passing away an idle hour, says the Chicago Record. "When the big circle is illuminated by electric lights it will be a guide to mariners which can be seen from farther than the lighthouse. The Auditorium tower or even the glare of the city lights of the city will be seen from the wheel. The hydrographic office considers the permanent location of the wheel at the corner of North Clark street and Wrightwood street of great importance that the light has been given place on the charts of the lake. In a recent bulletin issued from the office the wheel is mentioned as the most prominent landmark on the western shore. The government officials will be notified when the wheel is lighted, and a supplement will be issued to charted.

The wheel is visible at a much greater distance than when it was on the Midway. It is half a mile nearer the lake shore and is on higher ground. The height of the wheel from the ground is 274 feet, while the height above the lake level is 305 feet. On a clear day the wheel may be seen from Milwaukee, though the meanderings of the shore line prevent a clear view.

Gold Hunters Hungry.

Terrible news of destitution and suffering from cold and hunger sifts southward from the Alaskan gold fields. The rigors of the Arctic weather make gold hunting among the Alaskan glaciers probably the most hazardous quest in which miners can engage. The coast landing places are overrun with venture-seekers in search of fortunes, many of whom are either starved or the physical hardships they risk in endeavor or ignorant of the risks involved. The story of their troubles is most pitiful. At last accounts potatoes were selling in some of the mining regions for \$100 a sack.

Japs Want American Salmon.

A supply of Columbia river salmon is soon to be sent to Japan. The government of that country being anxious to ascertain if the salmon can be propagated in Japanese waters. There are some salmon in Japanese rivers but the supply is far short of the demand. The fish commissioners have agreed to furnish the eggs, which will be taken to Japan in a few days and placed in an artificial lake near Yokohama.

—The famous Mount Hood, of Oregon, is 11,570 feet high.

DEWEY'S PRIVATE CAR.

No Frills Outside and No End of Comfort in the Interior.

A glance into Chauncey M. Dewey's private travelling car shows that the railroad magnate lives in comfort and elegance while on the road. Something like \$40,000 was expended in making this palace on wheels one of the best specimens of the car builder's art possible. Mr. Dewey takes his annual tour over the railroad system of the country in this car, and recently he traveled about 10,000 miles, going twice across the continent, and when the car was turned over to the inspectors at the end of the journey for an overhauling not a nut or screw was found loose or out of order, and all that was necessary to prepare the car for another journey was to sweep and dust it.

Mr. Dewey is not a great lover of glitter and tinsel, and hence the exterior of his car is not particularly attractive. When he travels he does not care to have the eyes of the way-side stations where he may chance to stop flocking about and staring in at the windows to see what great man has come to town, and so the exterior of the car presents about the same appearance as other palace cars of the Wagner company. One has to explore the interior to find luxury, comfort and elegance.

The car is 74 feet long, and is fitted with Westinghouse air brakes, a whistle signal service to the engineer, steam heat, and an instrument which records the speed of the car. The indicator has often registered 35 miles an hour.

At the rear of the car is the observatory section. It is a small room, luxuriously upholstered and furnished with easy chairs and heavy plush. Large windows on the sides and rear give a complete view of the passing scenery. Next in order come the staterooms. These, in reality, are bedrooms, but they are large and commodious. They are three in number, and contain full-sized beds. Mr. Dewey never sleeps in a berth when traveling, and the room he occupies was always a small low two of the cubby holes called rooms in some New York flats. Each room is supplied with hot and cold water and electric call bells. The draperies and decorations are fit for a Fifth avenue hotel.

A narrow hallway runs along the front of these bedrooms and leads to the main saloon. This is also the dining-room. It is about 15 feet long, and is divided into two sections by a large glass partition. The woodwork is solid mahogany throughout. An immense French plate glass at the end of the saloon gives the compartment the appearance of being much larger than it really is. The windows are double-paned to keep out the dust. In one corner, by the great mirror, is a secretary, supplied with stationery and telegraph blanks, and above it is a compartment for books. This holds railroad manuals, reports of the interstate commerce and the state railroad commissions, and other books of that character for the convenience of Mr. Dewey. The windows are hung with heavy silk curtains, and the easy chairs are of plush and velvet. Around the center table from four to six persons may dine in comfort.

Next to the main saloon is a small section room with berths for use in emergencies, and then comes the porter's room, which is as well furnished almost as a stateroom in the average sleeping car. Beyond are the kitchen and pantries, and Mr. Dewey's own cook prepares all his meals while traveling. The kitchen is supplied with all the appointments necessary to a model kitchen.

Mr. Dewey's porter is William Patterson, a colored man, who has been in the employ of the Vanderbilts and Mr. Dewey for nearly 30 years. He has the absolute confidence of these railroad magnates, and they never journey anywhere without taking him with them. When not on the road Patterson holds himself in readiness for a call at any time. His fellow porters declare he has the best job in the gift of the New York Central. Patterson points proudly to the five gold stripes on his sleeve which denote his length of service in the employ of the New York Central railroad. Another stripe will be added next November, when he will have completed 30 years' continuous service. —N. Y. Sun.

This Sounds Fishy.

Three fish were caught on one hook by a fisherman at Ellsworth, Me., the other day. The apparent cause was an unusually large pickerel, but in dressing it another pickerel was found in its stomach, and in the second pickerel was a five-inch smelt.

—On the oldest monuments of Egypt, executed over 5,000, and perhaps nearly 6,000 years ago, there are representations of dogs closely resembling those now existing in that country.

—In 1758 the town of Christiania was almost destroyed, property estimated \$1,000,000 in value being blotted out.

HUNTING FOR A BURGLAR.

First Experience of the New Police-
man When the Alarm Was Given.

Mrs. P. M. Barnes occupies the house on the corner of Central park, west, at the corner of Eighty-fourth street. Last fall thieves got into the residence and carried away several thousand dollars' worth of diamonds. The police made an investigation, but did not recover the diamonds or capture the thieves, says the New York World.

Ever since the robbery the members of the Barnes household have kept watch for burglars. Extra chains and locks have been put on the doors and the servants make the rounds every night to see that everything is in order. In view of all this it is not surprising that their entire household was thrown into a small panic at 11 o'clock the other morning, when it was discovered by one of the members of the family that the chain was off and the front door unlocked and open.

Barnes shouted "thieves!" her son shouted "thieves!" and in fact the entire household shouted "thieves!" The ladies of the family became hysterical and gathered in the parlor, expecting every minute to see a highwayman or safe cracker emerge from his hiding place and attack them. When young Mr. Barnes heard the noise he said he would look for the police. He did not wait to put on all his clothes. He simply put on a big ulster and rushed out of the house. Mr. Barnes ran down Central park, west, and saw a policeman quickly pacing his beat. The policeman was William Hill, who is young and athletic. Hill had been a full-fledged member of the force just two days, but Mr. Barnes did not know this. Hill wore a brand new uniform and in his hip pocket he carried a big revolver, which was loaded, and a well-polished rosewood billy. The billy had not yet seen service.

"Officer," shouted Mr. Barnes, excitedly, "I want you to come with me in a hurry."

"What is it?" inquired Hill.

"Burglars, I suppose," said the young man. "You remember the diamond robbery that occurred in our house?"

Policeman Hill did not recall the incident, but having visions of burglars handcuffed to himself and a big reward, and probably an opportunity to shake the hand of Police Commissioner Roosevelt, he started on a double-quick up the avenue, closely followed by young Mr. Barnes.

"Here is your policeman," said young Mr. Barnes, as he entered the house. The ladies in the parlor were very much pleased to see the new guardian of the peace. They told him to be very careful indeed.

Policeman Hill had never met a real burglar in his life. At any rate he had never had the pleasure of putting one under arrest. To investigate a real burglar, and at a fashionable place, was a novelty to him. The first thing Hill did was to examine the front door. It was there all right, and so was the chain.

"Suppose you go down into the cellar," suggested the policeman, "and see if you can find anything there. The burglar did not shudder. He drew his club and calmly walked down the steps leading to the cellar. He crawled about the place where the coal and ashes are stored, and every nook and corner, soiled his brand new uniform, and satisfied himself that there were no burglars in that portion of the house, at least. He next examined the parlor. Then he went to the second and to the third floor. And yet no burglar here in sight. He poked his club into every closet. There was no burglar there. He went to the top floor and climbed out the roof. No burglar there. Then Hill bent a hasty retreat, assured the ladies that there were no burglars and went to the station-house. Mr. Barnes, when seen, said Hill had done woefully.

"Some member of the family must have left the front door open when going to church in the morning," said Mr. Barnes. "But since we had the big robbery there we always want to be on the lookout for thieves."

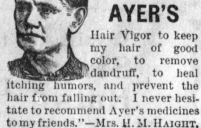

Europe's Stock of Gold.

Since 1890 the gold in European banks has increased by \$623,300,000. Of this the Imperial Bank of Russia has gained \$185,800,000, the Bank of France \$167,400,000, the Bank of England \$111,000,000, the Austro-Hungarian Bank \$79,800,000 and the Imperial Bank of Germany \$39,000,000. The gold comes from American monetary circulation and from the production of the gold mines. At the end of 1895 the Bank of France and the Imperial Bank of Russia between them held \$776,000,000 in gold, a little more than half the stock of gold in the European banks, and this does not include the gold in the Russian treasury, which is estimated at \$510,400,000. The gold in Germany, Austria, Prussia and Italy amounts to \$336,000,000, and that in the Bank of England to \$350,800,000. — Economist's European.

—Fichte was celebrated for his writings on philosophy before he was 20.

Well Satisfied with
Ayer's Hair Vigor.

"Nearly forty years ago, after some weeks of sickness, my hair turned gray. I began using Ayer's Hair Vigor, and was so well satisfied with the results that I have never tried any other kind of dressing. It requires only an occasional application of

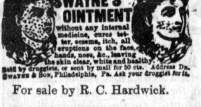

AYER'S
Hair Vigor to keep my hair of good color, to remove dandruff, to heal itching humors, and prevent the hair from falling out. I never hesitate to recommend Ayer's medicine to my friends." — Mrs. H. M. HARRIS, Avoca, Nebr.

AYER'S
Hair Vigor

Take Ayer's Sarsaparilla for the Complexion.

For sale by R. C. Hardwick.

The Nile, from its delta to the great lakes in Central Africa, is over 4,000 miles in length.

The waman often eats his lunch on the same table he does his work. The office man turns his desk into a dining-table. Neither gets the out of doors exercise he needs, and he takes the proper time for eating. It is small wonder that the digestion of both gets out of order. In such a case Dr. Pierce's Food is a cure to their assistance. It is a nature taking care of the food.

The cause of nine-tenths of the sickness of the world is constipation. From this one cause come indigestion, disorders of the stomach, liver, kidneys, biliousness, headaches, flatulence, heartburn, impurity of the blood and the serious complications that follow. To begin with, constipation is a little thing, and a little thing will cure it. The "Pleasant Pills" are tiny sugar-coated granules. They will perfectly cure the worst case of constipation and indigestion. If the druggist try to sell you some other pill that says him greater profits, just think of what will best pay you.

The Irish, in Siberia, is 2,200 miles in length and drains 600,000 miles of territory.

Are these Of those unhappy people who are suffering with weak nerves, starting at every slight sound, unable to endure any unusual disturbance, finding it impossible to sleep? Avoid opium and nerve compounds. Feed the nerves upon blood made pure and nourishing by the great blood purifier and true nerve tonic, Hood's Sarsaparilla.

H. O. P. Pills are the best after dinner pills as aid digestion, prevent constipation. 25c.

The Columbia river of Canada is 1,400 miles in length, the stream of the same name in Oregon is 600.

Out of weakness comes strength when the blood has been purified, enriched and vitalized by Hood's Sarsaparilla.

There are twenty creeks in this country which have been dignified with the name of Tiber.

The Thames, of England, is 220 miles long. The river of the same name in Canada is 160.

Bill Nye often spoke his witticisms laden with the greatest truths. Among the most noticeable, most timely and most apropos is the following: "A man may use a wart on the back of his neck for a collar button; ride on the back end of a train to save interest on his money; until the conductor comes around; stop his hat at night to save the wear and tear, leave his 'I' and 'T' without a dot or cross to save ink; pasture his mother's grave to save corn; but a man of this kind is a gentleman and a scholar compared to a fellow who has to years of success guarantees in his pocket, and who when he is asked to pay for it, puts it into the post-office and have it marked 'refused.' — Louisville Commercial.

Women

How common are chronic diseases peculiar to women! How many are due to deranged kidneys and failure of the system to perform their natural functions.

WINTERSMITH'S
Buchu corrects the primary cause, builds up and strengthens these organs. It is a years of success guarantees in its use. It will cure all other complications, and better health.

BUCHU.

BREVITIES OF FUN.

—Mrs. Wicks: "Why don't you ever wash your face?" Dismal Dawson: "Don't want the sun to get a chance to split me complexion." — Indianapolis Journal.

—Topsy-turvydom:—"No. Henry dear, I cannot be yours!" "Do you reject me?" "No, but since I am a member of the Woman's Emancipation league, I cannot belong to a man but you may be mine—if you like." — La Moda.

—"Feel all at sea, old man?" asked the seasoned passenger, who thought he saw a chance to get funny. "No," said the dejected passenger, who was leaning over the side of the ship, "I guess there is still a remnant of me on board." — Indianapolis Journal.

—"How did Billings, the actor, come to change boarding-houses?" "His landlady got personal the other morning." "How was that?" "Well, she was particularly proud of her breakfast, and she asked him how the eggs struck him." — Baltimore Herald.

—Mrs. Wurrey (to police captain): "Have you found any trace of my boy? He's been away all day and I cannot find out anything as to his whereabouts." Police Captain: "Rest easy, madam; describe the boy and we'll send a man down to the continuous performance theater at once and get him for you." — Roxbury Gazette.

—"Sometimes," said the merchant, "I feel like the poet who wanted a lodge in some vast wilderness. I yearn for solitude and silence." "Well," replied his friend, sympathetically, "it's an expensive taste, to gratify. But you might start in by taking your advertisement out of the newspapers." — Washington Star.

MILK JARS.

The Origin of a Package That is Now in Common Use.

Milk jars, or bottles, now so commonly used, were introduced about 15 years ago. A gentleman farmer of Litchfield, Conn., a man of wealth, who owned blooded cows, finding, with the increase of his stock, his milk supply growing beyond his own needs, decided to sell the surplus. He desired to put up his milk in some distinctive form, and came to New York to the headquarters here of glass works, and asked to have got up for him some kind of a glass package that would be suitable for the purpose and convenient for shipping. A jar was produced that was substantially similar in form to the one now in use. The first jars were provided with glass stoppers; these were found to break too easily, and a metal stopper was soon substituted. This form of package for milk at once became popular. The owner of the farm for which the milk jar was first made turned his farm over to a stock company, which increased its production greatly. It still remains a large establishment and one whose dairy products are well known.

Many other milk producers adopted the milk jar, and its general use extended rapidly. Probably at least 75 per cent of the milk for family use is delivered now in bottles. There are millions of bottles in constant use, and the number produced annually to make good the breakage and to supply the increasing demand is about 20,000 gross. — N. Y. Sun.

Talking Without a Tongue.

Ability to talk without a tongue seems a paradox, but a Bradford (Pa.) doctor is evidence in his own person that it is possible. Dr. A. M. Williams was afflicted with a disease which rendered necessary the removal of the entire tongue, the left tonsil, and some neighboring glands. With these gone, according to general belief, speech would be impossible. Yet Dr. Williams "can speak so as to be fairly well understood," a correspondent of the Philadelphia Ledger reports, and he has expectations that within a short time his speech will greatly improve. In studying out the subject of speech the doctor discovered that persons are "right" or "left" in the use of the organs of the mouth and throat, as they are in the use of the hands. In his own case he was "left" in the use of the mouth and throat muscles—a circumstance which makes his ability to talk the more remarkable, because some of the organs of the left side had been removed with the tongue. He is inclined to the theory that, while the preferred use of the right or left hand is generally a case of education or choice, the involuntary discrimination which leads to the use of one set of throat muscles in most cases the result of heredity.

Bank of England Notes.

The Bank of England note is not of the same thickness all through. The paper is thicker in the left hand corner to enable it to take better and sharper impression of the vignette there, and is also considerably thicker in the dark corners, where the letters and under the figures at the ends. Counterfeit notes are invariably of one thickness.

What is

CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrup, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

DR. G. C. OSOON, Lowell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quick nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other harmful agents down their throats, thereby sending them to premature graves."

DR. J. F. KIRKWOOD, Conway, Ark.

OFFICE 215 SOUTH MAIN STREET

—FRIDAY, JUNE 12, 1896.

We are authorized to announce
HON. MALCOLM YEAMAN,
of Henderson county, as a candidate for
APPELLATE JUDGE
in the First District, subject to the action of
the Democratic party.

DEMOCRATIC ELECTIONAL TICKET

State—Jas. P. Tarrin, Kenton.
at large—J. W. B. Smith, Madison.
First—J. C. Fournier, Fulton.
Second—C. W. Bransford, Daviess.
Third—Ed B. Drake, Allen.
Fourth—Gus Brown, Breckinridge.
Fifth—Wallace McKay, Jefferson.
Sixth—Harvey Myers, Kenton.
Seventh—W. P. Kimball, Fayette.
Eighth—L. H. Carter, Anderson.
Ninth—W. G. Ramsey, Boone.
Tenth—T. J. Wells, Morgan.
Eleventh—Henry Beauchamp, Metcalfe.

Dr. Clardy Should Be Elected.

It is now less than sixty days until the congressional primaries will be held and Hon. J. D. Clardy has no announced opposition for the congressional nomination. Several gentlemen have been suggested as candidates, but none of them has so far made a formal entrance into the race. The impression is now pretty generally fixed over the district that the talked of opposition will not materialize and that Dr. Clardy will be given the usual endorsement of a re-nomination, without a contest. This is as it should be. Dr. Clardy is undoubtedly the strongest candidate we can present at this time. He held the district secure to the Democratic moorings in 1894 by nearly 3,000 majority, when the Republican landslide struck the rest of the country with such force. He more than any other man can do so this year. His career in congress has been one of faithful service, close attention to the public business and consistent advocacy of the principles of the party. The interests of his constituents have been carefully guarded and the passage of his tobacco bill gives promise of a substantial benefit to the people, not only for his own district, but of the whole country as well. It is an unwritten law of the district that a faithful public servant is entitled to the endorsement of a re-nomination. We cannot believe that the people of the district will feel inclined to make an exception to this rule in the present instance. Dr. Clardy is in harmony with the Democratic platform in all respects. He has been a consistent advocate of double standard Democracy when it was not as popular to take such a stand as it will be hereafter, now that the question upon which differences existed has been settled within the party for some years to come at least. He is no new convert to the "old time revision" that is "good enough for all." He has all along been strong for bimetallicism, but at the same time conservative and willing to respect the opinions of those who did not agree with him. As a result of this, he has many strong supporters among the gold-standard Democrats, who are earnestly advocating his re-nomination as the logical and winning candidate at this crisis in our political affairs.

Dr. Clardy is strong among the farmers and as the district is an agricultural section, his greatest strength is with the dominant class of voters. This vote constitutes the great reserve strength of the party in doubtful contests and must be brought out in times of danger. No other man is better qualified to organize and entice the farmers than Dr. Clardy, who is personally acquainted with farmers in every voting precinct in the district.

He can stir up the country Democrats, bring out the silent vote and bring back into line the district, that last year gave a plurality of more than 400 for the Republican ticket. With him as the nominee, the majority would be even larger than it was two years ago. It is doubtful if there would be any other candidate besides the weak and discredited nominee of the Republican party. In that event the 6,000 or 6,000 Populists in the district could be relied upon to vote almost to a man against Franks and for Dr. Clardy. Most of these voters are farmers and were formerly Democrats and Dr. Clardy more than any other leader is in a position to lead them back to their "first love," because he is himself a

farmer and a silver man. All things considered, Dr. Clardy possesses so many elements of strength that he should be given the compliment of a re-nomination by acclamation when the convention meets at Madisonville August 10. The stream we have to cross is wide and deep and this is not a good time to swap horses.

THE APPELLATE JUDGESHIP.

The State convention being over the attention of our people will soon be called to another very important matter, the election of an Appellate Judge to fill the vacancy resulting from Judge Grace's death. No office in the gift of the people of the State is of greater importance, and no higher duty rests upon the citizen than that of filling it with a lawyer of ability, integrity and industry. Already the court is so behind that justice is almost denied to the citizen who is so unfortunate as to have his rights involved in legal controversy.

Henderson county presents to the district an aspirant for the Democratic nomination to that high office. Mr. Yeaman is a Democrat who has never faltered in his support of the nominees of his party, on the contrary he has always been outspoken and active in their support.

Excepting his candidacy two years ago for this position, he has never been a candidate for office. His life has been devoted to the pursuit of his profession and the discharge of the duties of a private citizen with such success that he is known throughout the State as among the ablest of her lawyers, and as among her most influential citizens. He is in full maturity of his intellectual and physical manhood, with an industry rarely equaled and a mental training that enables him to make every effort effective in the accomplishment of his purpose. His intellect is clear and forcible. In his legal questions and the expounding of them in his decisions he would do as much and as good work as has been done by any member of the court. To the Democracy of the district we commend him as the equal of any man in the State for the equal position, which the Democracy is called upon to fill at the November election—Gleener.

Hon. Malcolm Yeaman, of Henderson county, is a candidate for the Democratic nomination for Appellate Judge of the First Kentucky District. Mr. Yeaman is a lawyer of eminent ability, irreproachable moral character and strong in mental and physical vigor. He has been a student all of his life and his learning is manifested in his pleadings, in his speeches and in his daily conversation alike. He is not only an able and learned lawyer but a true gentleman in the strictest sense. One might associate with him for years and not a single ungentlemanly act of his would mar the association.

He is not a fin de siècle politician. And The Sun knows of no recommendation more favorable to his candidacy that can be offered than this: He has never become contaminated in any of the struggles for spoils; he has not been the height of his ambition, have at his disposal the distribution of the offices in his district. In a nutshell his political record is clean, unblemished by demagogic appeals to the prejudices of classes or sections or any of the other strategic and insincere methods of the latter-day office-seeker.—Morganfield Sun.

Hon. Malcolm Yeaman was Judge Grace's strongest competitor for the nomination two years ago, and he made an admirable impression upon the convention that nominated Judge Grace. Mr. Yeaman is in the prime of life and mental vigor; and has long been regarded as one of the very ablest lawyers in Kentucky.

He is not only a gentleman of fine legal ability, but also of the highest scholastic attainments; and his social qualities are delightful. If he should be elected to succeed Judge Grace, he will honor the place, and add strength of law and literary acquirement to Kentucky's Court of Last Resort. He is a Democrat whose party fealty has never been questioned and whose creed has known no changing.

We commend Mr. Yeaman to the Democrats of the district as a very worthy of their support.—Eddyville Tale of Two Cities.

Since the country has gone for silver, Russell, of Massachusetts, who has the instructed votes of Massachusetts and Rhode Island, announces that his name will not be presented in the Chicago convention, for President.

More

Medicinal value in a bottle of Hood's Sarsaparilla than in any other preparation. More skill is required, more care and more expense incurred in its manufacture. It costs the proprietor and the dealer but it costs the consumer less, as he gets more doses for his money. More confidence is secured by its peculiar combination, proportion and process, which make it peculiar to itself. More people are enlightened and more agencies included in its Laboratory than any other. More wonderful cures effected and more testimonials received, than by any other sales and more increase year by year are reported by druggists. More people are taking Hood's Sarsaparilla today than any other, and more are taking it today than ever before. More still, more reasons might be given why you should take

Hood's Sarsaparilla

The One True Blood Purifier. \$1 per bottle.
Hood's Pills cure all Liver Ills and Biliousness, Sick Headache, 30 cents.

FIGURES CAN'T LIE.

(Louisville Critic.)

The assurance of a Western Democrat as a candidate for President on a free silver platform means the Democratic party has taken the only chance that could possibly leave it in control of the national government. The goldbug newspapers will argue that the highway to perdition is paved with silver dollars at the ratio of 16 to 1 and that the party is going down that thoroughfare better-sketched to destruction. But a dispassionate look at the situation does not justify so hopeless a prophecy. The gold men have the East and they are welcome to it, but that portion of the national domain, the West and the South, which has been the greatest sufferers from the single standard policy, is a unit for free coinage.

A comparison of the electoral votes will prove how rosy are the possibilities of Democratic success. Here are the States that can be safely counted for gold:

Connecticut	6
Delaware	3
Maine	3
Maryland	6
Massachusetts	16
New Hampshire	4
New Jersey	10
New York	36
Pennsylvania	32
Rhode Island	4
Vermont	4

Total.....128
The following States are certain to cast their votes for free silver:

Alabama	11
Arkansas	8
California	8
Colorado	4
Florida	4
Georgia	13
Idaho	3
Indiana	15
Kentucky	13
Louisiana	8
Mississippi	9
Missouri	17
Montana	3
Nevada	3
North Carolina	11
North Dakota	3
Oregon	4
South Dakota	4
Tennessee	12
Texas	12
Utah	3
Virginia	12
West Virginia	6
Washington	4
Wyoming	8

Total.....206

The remaining States can be classed as doubtful although Illinois, Michigan, Kansas and Nebraska all have a strong free-silver sentiment among their people:

Iowa	13
Kansas	10
Michigan	14
Minnesota	10
Nebraska	9
Ohio	8
Wisconsin	12
Illinois	12

Total.....113

More total electoral vote is 447, and 224 votes are necessary to elect. A summary shows:

For silver	206
For gold	128
Doubtful	123

If the free-silver candidate carries Illinois he will win and have six votes to spare. If he carries Michigan and Nebraska he will be elected. If he carries Wisconsin and Nebraska he is certain of victory.

The Indianapolis Post has interviewed 53 leading correspondents of eastern dailies on their way to the St. Louis convention, asking them who would in their opinion be nominated at Chicago and what would be

Pre-emptory Sale of STRAW HATS.

Mammoth Clothing and Shoe Company

the result. The answers showed 27 for Boies, 12 for Teller, 5 for Stevenson, 2 for Matthews, 2 for Campbell, and one each for Blackburn and Hill, and two in infinite. On the question of election, 25 predicted the election of the Republican ticket, 17 thought the Democrats would win and 11 believed the election would be thrown into the House. All but two or three thought the Chicago platform would be straight out for free silver.

Judge Malcolm Yeaman, of our neighboring county of Henderson, should and we believe will receive the vote of Christian county in the appellate district convention July 31. In point of ability and merit he is the equal if not the superior of any man in the race, and our people should see that his claims are not put aside for those of less deserving candidates.

The city of Cincinnati went for silver Monday by 4000 majority in a primary election. Only two gold delegates out of 68 were elected to the State convention. This result may be attributed in a great measure to the excellent work done by the Enquirer in educating the people. Ohio is now safely anchored in the silver column at Chicago.

Jos. Stultz, of Louisville, who was sent to the penitentiary 7 years ago for swearing falsely in regard to the case of Carrie Ashby, a 14 year old girl whom he married, was released a few days ago, having served out his term. Stultz at once sought his former wife and remarried her, this time without objection.

Members of county committees in the Second district, who desire to tender their resignations as such, should forward them to Hon. S. A. Young, of Henderson, who has charge of the reorganization of the party in this district. County chairmen should also notify him of any vacancies to be filled.

The Bardonia Record is publishing a call for a committee meeting fourth by "J. J. Whitworth, Chairman Fourth District Committee." The Chairman of that committee is now Hon. Geo. S. Fulton, of Bardonia, who became such on the 4th inst., when the party machinery was reorganized.

Attorney General Harmon, of Cincinnati, another member of the Cabinet, was unable to keep his home county from going for free silver by a vote of 66 to 2. In the interest of Harmony, Gen. Harmon should move to make it unanimous.

It is very unfortunate for Louisville that she should have so misunderstood the people of Kentucky. The metropolis should have been first in the great cause of constitutional money.—Henderson Gleener.

Rastus will not be entertained at the first-class hotels in St. Louis and as most of the Southern delegates are aggrieved, there is much kicking and complaining over the complication that has arisen.

Col. Fred D. Grant, of New York, and U. S. Grant, Jr., of California, sons of Gen. U. S. Grant, are both mentioned as candidates for Vice-President on the McKinley ticket.

Watch Repairing

Is a Very Important Part of Our Business
and we give careful, painstaking attention to it. We try to have our work give such satisfaction as will win the confidence of all who leave their watch repairing in our hands. We want you to feel that when you leave your watch with us for repairs the work will be done in a competent manner. It is our ambition to add to the reputation we think we have already established—doing honest, thorough watch repairing.

GERMAN LIVER SYRUP.

The only sure cure for Constipation and Piles in the world.

Permanently cures Dyspepsia, Indigestion, Dizziness, Nervous Prostration, Sick Headaches, Distress After Eating, Biliousness, Scurvy of Food, Sleepless Nights, Loss of Appetite, Eruptions, Feels Tired, Bloating, Aches, Etc., Etc.

Dr. O. A. CARLSTEDT'S GERMAN LIVER SYRUP.

Delay not a moment when Costive or Bilious as serious results may follow neglect. SICK HEADACHE, NO MORE.

WHAT THE DOCTOR SAYS.

I suffered nearly three years with my head. I had severe headaches and during the last year dizziness, pressure and throbbing in the brain. I have taken three bottles of Dr. O. A. Carlstedt's German Liver Syrup and my head is now well.

Newburg, N. Y. Mrs. A. S. JONES.

TIED, COULD NOT SLEEP AT NIGHT.

From overwork I became nervous, tired, weak, exhausted and unable to sleep or rest. I finally took Dr. O. A. Carlstedt's German Liver Syrup and now sleep soundly every night from eight to ten hours. I am well and life is a pleasure.

Amo, Kansas. EDWARD A. CRAWFORD.

HAD THE BLUES, AND GAVE UP.

Last February I felt very badly. I kept getting worse until I was almost mad. I could not love my own children. I was on the brink of suicide. Finally I got a bottle of Dr. O. A. Carlstedt's German Liver Syrup. That night, for the first time in months, I slept well and began to improve. Now I am well and a truly happy woman.

Mrs. T. O. SCHMIDT, Milwaukee, Wis.

CHRONIC HEADACHE, NERVOUSNESS.

I was a sufferer from chronic nervous headaches and sleeplessness. Life became a burden. I tried doctors in vain: finally I took Dr. O. A. Carlstedt's German Liver Syrup and I firmly believe it saved my life.

Miss Pearl Campbell.

Englewood, Ills.

HEADACHES, INDIGESTION, ETC. 22 YEARS.

For 22 years I had headaches, indigestion, constipation and general debility with pains in my sides and shoulders. I tried doctors and all in vain. Finally I took Dr. O. A. Carlstedt's German Liver Syrup and it's worth its weight in gold.

The Zambesi, in South Africa, is 830 in length.

When You Take Your Vacation the most necessary article to have with you (after your pocket book) is a bottle of Foley's Colic and Diarrhoea Cure. It is an absolute prevention or cure of all derangements of the bowels caused by a change of water. You are likely to need it. For sale by C. K. Wyly.

The World-famous Orontes is only 240 miles long.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

The Tiber is only 230 miles long.

If it required an annual outlay of \$100.00 to insure a family against any serious consequences from an attack of bowel complaint during the year there are many who would feel it their duty to pay it; that they could not afford to risk their lives, and those of their family for such an amount. Any one can get this insurance for 25 cents, that being the price of a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. In almost every neighborhood some one has died from an attack of bowel complaint before medicine could be procured or a physician summoned. One or two doses of this remedy will cure any ordinary case. It never fails. Can you afford to take the risk for so small an amount? For sale by R. C. Hardwick.

The Potomac river is only 500 miles long and in its lower course is rather an estuary than a stream.

Mr. James Perdue, an old soldier residing at Monroe, Mich., was severely afflicted with rheumatism but received prompt relief from pain by using Chamberlain's Pain Balm. He says: "At times my back would ache so badly that I could hardly raise up. If I had not gotten relief I would not be here to write these few lines. Chamberlain's Pain Balm has done me a great deal of good and I feel very thankful for it." For sale by R. C. Hardwick, druggist.

The Arkansas river is 2,160 miles long, but at various points in its course is very thin for its length.

FROM AN ARTESIAN WELL.

Strange Animals Now Being Examined by Experts in Washington.

Zoological experts at the Smithsonian Institution are busy studying and inventing names for the strange animals caught up by the wonderful artesian well at San Marcos, Tex. The cavity struck by the drill was undoubtedly the tunnel of a subterranean river. That the waters of this underground stream are full of life is satisfactorily proved by the great number of animals of various kinds which are thrown out at the surface through the artesian pipe. But it is not their quantity that excites astonishment nearly so much as their strange character. All of them appear to belong to species hitherto wholly unknown to science. There are shrimps of a queer kind, of which the well yields about half a pint a day, on an average—saw-bugs of a new genus, not related to any hitherto found in fresh water, and, most remarkable of all, salamanders six inches long with surprisingly developed legs.

All of the species of animals thus far brought to the surface are blind and colorless, resembling those that respect the crustaceans and batrachians of the great caves, where there is everlasting night. Dr. Stejneger, who knows as much about salamanders as any man living, has been making a special study of the San Marcos specimens. He finds that they have no near relatives with which science is acquainted in this country or abroad. Their nearest kin are the so-called mud-puppies of our streams and certain batrachians of Austrian caverns. They have remarkably long legs, and their noses are shovel-shaped.

Most numerous by far among the creatures cast up from the depths have been the shrimps. They are about three-quarters of an inch long, colorless and blind. In and attached to their bodies are found immense numbers of parasitic protozoa, which are nearly related to the micro-organisms that breed malaria in the human system. This fact has an interesting bearing upon the theory hitherto accepted that artesian water is necessarily free from malaria microbes. The mud-puppies already referred to, which are crustaceans, have only been familiar up to now as salt water forms. They get a living commonly by attaching themselves to fishes, out of whose flesh they are able to take their life by means of their strong jaws, which are furnished with a sort of knife and fork arrangement. One small and new species of leech turned up with the rest of the animals.—Washington Correspondence. Boston Transcript.

AN INGENUOUS BRAHMA.

Hawk Foiled of His Prey by the Adroitness of a Hen.

J. C. Wheatan, living in this county, has some very fine banded chickens which he raises for the Fort Worth market, says a McKinney (Tex.) letter to the Philadelphia Times. While most of his poultry is all of the darker breeds, he recently imported a fine pair of white Brahmas, which in due course presented him with 16 chicks. Last week these little fellows were just good flying size and were ready prey for hawks, their white feathers gleaming in the sun and making them visible from afar. In fact, in spite of Wheatan's efforts, the hawks made away with six of the young Brahmas.

One morning, however, after the remaining ten had been duly accounted for the night before, Wheatan was surprised, on going to the poultry yard, to see not one single white chicken. The Brahma cock and hen were there all right enough, but instead of their own snowy little ones ten bedraggled, cast-off looking black chicks peeped at their heels. For a long time Wheatan could not imagine what was the matter, but, by and by, he concluded that the little Brahmas had got in the soot box by accident and that they were still on hand, though somewhat discolored.

That night, however, he discovered that what he had attributed to error had been done deliberately and with wise intent. Before the old Brahma would let her little ones tuck in for the night she made them dip and sputter in the big chicken trough by the wall. This done, she led the way to an old stovepipe under the woodshed, and made every last chick of them pass through the pipe, wiping off the soot as they went. Of course, it stuck to their wet feathers, and the little fellows came out perfect blackamoors. The old hen circumvented the hawks, however. Her little brood runs about as gay as you please now, and not one has disappeared since. She hit upon so ingenious a plan for their protection.

Who Told Him So?

The prefect of police in Paris has decided that an unmarried woman 30 years of age is an old maid.

Martial, the Latin artist, wrote epigrams when he was only 12 years old.

There is no dividing line.

Battle Ax PLUG

DON'T FORGET for 5 cents you get almost as much "Battle Ax" as you do of other brands for 10 cents. DON'T FORGET that "Battle Ax" is made of the best leaf grown, and the quality cannot be improved. DON'T FORGET, no matter how much you are charged for a small piece of other brands, the chew is no better than "Battle Ax." DON'T FORGET, "Economy is wealth," and you want all you can get for your money. Why pay 10 cents for other brands when you can get "Battle Ax" for 5 cents?

BIRDS AS PROPHETS.

Some Signs by Which Close Observers May Foretell Storms.
If birds in general pick their feathers, wash their heads and fly to their nests, expect rain.
When birds come to sing, rain and thunder will probably occur.
Birds and fowling their feathers indicate rain.

Blackbirds flying in groups during rain or wind indicate hail.
Blackbirds bring healthy weather.
Blackbirds' notes are very shrill in advance of rain.

A solitary turkey buzzard at a great altitude indicates rain.
If the rooster crows more than usual, or earlier, expect rain.

Roosters are said to clap their wings in an unusual manner before rain, and hence to rub in the dust and seem very uneasy.

If the crows make much noise and fly round and round, expect rain.
The crow flying alone is a sign of foul weather, but if crows fly in pairs expect fine weather.

Cuckoos hallooing in low lands indicate rain; on high lands, fair weather.
The cuckoo in April opens his bill, may he sing all day, in June he alters his tune, come August, go he must.

When fowls roost in daytime, expect rain.
When the hen crows, expect a storm within and without.

When you see geese in water washing themselves, expect rain.
Geese wash and sparrows fly in flocks before rain.

When the roosters go crowing to bed, they will rise with watery head.
If a rooster crows on the ground, it is a sign of rain; if he crows on the fence, it is a sign of fair weather.

A crowing rooster during rain indicates fair weather.
Birds singing during rain indicates fair weather.—Boston Transcript.

ANCIENT THIMBLES.

The Old Gold Ones Worn by Our Grandmothers.

Even those people who like to joke at sentiment fail to laugh at the old gold thimbles of their grandmothers—the metal worn out in countless places and all stamped with the signs of use, says a writer in the Chicago Chronicle.

Grandfather's thimble and the old armchair have had their day, and it is high time that grandmother's thimble was immortalized in rhyme. Now that silver is so cheap, silver thimbles are possible for every one, and as celluloid is also used for thimbles, the brass ones, which brought so much suffering in the way of sore fingers, are rapidly passing out of existence.

In this day when collections are the fashion of the times, it would seem that a collection of thimbles would be most interesting. Fashions have changed very little, but the shapes are by no means identical, and what are known as tailors' thimbles, and those of no top, and the one made of gold or silver and even studded with jewels. Tiny pearls on gold thimbles is a favorite fashion, albeit a very perishable one, for such small stones can never be set sufficiently deep to make them quite secure, besides pearls and turquoise become discolored very quickly when in constant use.

Every thimble has not been in fashion for many generations, and those which are shown as heirlooms are exceedingly clumsy, and do not look as though they could have been very comfortable. There is one use to which thimbles have been put which is not generally known. As the ends of the ends of the fingers taper, and in the stern days of long ago many a young girl was forced to sleep with each finger securely fixed in a tightly fitting thimble of silver or gold. The remedy is said to have been efficacious.

Elk Trained to Harness.

Eleven elk that have been broken to harness and trained to drive single, double and tandem, are owned by two men of Columbia Falls, Mont. They were captured about a year ago and were easily tamed, being now as gentle as horses.

They were taken by hunters on skis. When an elk was shot it was driven down the mountain side into the deep snow in the valleys and there roped and made captive. The owners have had others ranging from \$200 to \$250 apiece, for the animals, but none of them for sale.

—Mount Etna, the largest volcano in Europe, and one of the largest in the world, is 10,050 feet high, and 90 miles in circumference at its base.

Another big log raft is soon to be made up in the Columbia river to be towed down the coast to San Francisco. It is to consist of piles amounting to about 700,000 feet of lumber, board measure. If the raft reaches San Francisco intact the piles can be sold there 30 or 40 per cent cheaper than if they were transported by schooners in the usual way. Those interested in the scheme say that experience with former rafts has enabled them to reduce the risk to a minimum, and they have no doubt that the big raft will reach San Francisco safely.

A Big Raft.

Another big log raft is soon to be made up in the Columbia river to be towed down the coast to San Francisco. It is to consist of piles amounting to about 700,000 feet of lumber, board measure. If the raft reaches San Francisco intact the piles can be sold there 30 or 40 per cent cheaper than if they were transported by schooners in the usual way. Those interested in the scheme say that experience with former rafts has enabled them to reduce the risk to a minimum, and they have no doubt that the big raft will reach San Francisco safely.

Another big log raft is soon to be made up in the Columbia river to be towed down the coast to San Francisco. It is to consist of piles amounting to about 700,000 feet of lumber, board measure. If the raft reaches San Francisco intact the piles can be sold there 30 or 40 per cent cheaper than if they were transported by schooners in the usual way. Those interested in the scheme say that experience with former rafts has enabled them to reduce the risk to a minimum, and they have no doubt that the big raft will reach San Francisco safely.

CORSETS BARRED.

Novel Difficulty in the Electrical Department of a Girl's School.

A new reason why the new woman must discard one of the most characteristically feminine articles of her attire or fall short of filling her role has turned up at the girls' high school at Oakland, Cal. She must either abandon corsets or one of the most promising of the professions, that embracing electricity in all its branches.

Five hundred Oakland co-eds are seriously disturbed over the situation, but the issue is severely plain. One or the other must be abandoned, the governors of the school say.

An electrical department was added to the school some time ago, and a course in electricity established. The poor professor in charge has had a dreadful time. During the lessons the delicate instruments have played him all sorts of tricks, and all his experiments have been of doubtful success. Every once in while a girl would stop up to tell what she had learned about volts, ohms and amperes, and immediately the galvanometers would gyrate wildly and the needles on the various dials would wobble, and all the laws of Volta and Ohm and Faraday would go to smash, and the findings of Edison and Tesla would become strangely lost. Then the professor knew the student beside him had on a high-grade corset with ribs of finest steel. The instruments were not affected by the presence of some students, because they wore health waists of some sort and were braced with whalebone or some substitute for steel.

The professor made poor progress with his class. It was impossible to make accurate experiments before some girls, and among these were the most promising girls in the class. Something had to be done; but the professor, being a man, felt a natural delicacy about doing anything.

Two of the women teachers tackled the girls on hygiene and physical development, and warned them of the evils of corsets. But the real motive of the crusade looked out, and at present there is much perturbation among the ambitious co-eds, who are anxious for scientific attainments, but yet have all the hundred stresses a woman can advance for not discarding the corset.

"This corset trouble is of long standing," Prof. Meads of the electrical department told an Examiner reporter. "The machines in the electrical department are delicately constructed, and they are so much affected by the near presence of steel or iron that it is utterly impossible to secure accurate results in experiments. I have been compelled to have the physical culture teacher explain to the girls that they must discard their corsets before they take their lessons in the electrical department. I can tell at once by the jumping of the needles that a girl is wearing corsets. It is simply a question of having the girls recite their lessons properly, and they can do so now wearing corsets."

Finally Prof. Meads was obliged to issue a rule barring corseted girls from the electrical department, and the governors indorsed the rule. It might seem to be a rule difficult to enforce and delicate to handle. But Prof. Meads finds it easy. In entering the electrical department the girls have to pass one of the professor's sensitive galvanometers. The professor stands unobtrusively beside it. The impatient "jigger" works like a charm, and there is no way in which the girls can beat the machine. On the next approach of a girl wearing steel-ribbed corsets the needle gyrates frantically, and the girl is respectfully but firmly reminded of the rule, and expostulations are useless. If the girl is a prominent gymnast, she said, she was impressed with the fine bearing of the eastern girls as compared with the California girls. She concedes that California girls are just as richly endowed by nature as the eastern girls, but they have had but little gymnastic training.
